Test 1 FAMILY LIFE

Task 1.1 You are going to read the text aloud. You have 1.5 minutes to read the text silently, and then be ready to read it aloud. Remember that you will not have more than 2 minutes for reading aloud.

A British family has recently celebrated the birth of their 18th child. It was a girl and her brothers and sisters have welcomed their new sister. Her eldest brother is 26 and the parents already have two grandchildren. The family announced the birth of the child on their family website. They described the girl as "beautiful". The family owns a bakery and hopes the children will take over the family business. It looks as if the era when the average British family would have only two or three children is over. In Britain there are more families with four children than anywhere else in Europe. Social scientists say that this is the result of immigration into the country of families from Asia and Africa.

Task 1.2 You are going to take part in a telephone survey. You have to answer six questions. Give full answers to the questions. Remember that you have 40 seconds to answer each question.

Task 1.3 You are going to give a talk about relationship with friends. You will have to start in 1.5 minutes and speak for not more than 2 minutes.

Everybody knows that our appearance matters in what people think about us. Appearance is important not only in a romantic relationship but also in politics. Appearance is not all about beauty. The moment we see a person our mind starts evaluating their personality according to their looks. What especially matters is the person's face. This means that the impression somebody's face makes on others can cost the person his or her political career. When we vote for a candidate we think that we are weighing his or her personal qualities. In fact, we are examining their face. Research has shown that if a candidate's appearance displays competence, power and leadership, but not beauty or good looks, it can cause a political victory or defeat. These findings are really important.

Mobile phones have become very popular and texting is taking the lead. In many situations sending text messages called SMS via the telephone is more preferable than emailing somebody. Unlike emails, SMS texts are delivered alerting the telephone owner to the arrival of a new message. Not many of us check their email on a regular basis while SMS texts have a sense of urgency and we must answer them at once. Besides, texting is used for personal contacts while emails are often the channel of business communication. Besides, industrial waste has polluted much of the fresh water resources. Agriculture demands its share of water as well. This means that the water supply is decreasing. Less fresh water on the planet means not only thirst but also hunger. The reason is that human beings depend upon fish and animals for food.
